JUST FOR ELEGANT KITCHEN LIFE.

DECO

JUST FOR ELEGANT KITCHEN LIFE.

DECO

ABOUT DECO

Founded in 2003, Ningbo Deco Kitchen Utensils Limited Company is a leading supplier of kitchen products located in Ningbo, China.

Deco has become a diverse company with production that covers all the sorts of molds and hardware. We now provide an integrated solution for sinks, faucets, electrical appliance, accessories and fittings. The in-house computerized mould division has over a hundred different designs to enable us to meet the demands of our clients worldwide.

Drawing on history reliability and expertise, we build rewarding and enduring partnerships. We help our partners enhance their businesses and ease their customers' lives by making work in the kitchen a pleasure.

"Better than Perfection", we believe our creations and technological breakthrough bring customers great values, at the same time, enabling families across the globe to benefit from having artistic and upscale kitchens.

UNIQUE DOUBLE-FILTER STRAINER

Unique square and round double filter design, upper square filter make it harmony with the sink body, lower rounded filter, make it available for food waste disposer installing.

THE REVERSIBILITY

It refers to the possibility of being installed in either right or left versions, as the sink is totally symmetric. The presence of tap holes or pop-up system indicates the lack of reversibility.

THE THICKNESS

It is related to the characteristics of the raw material. It usually varies from 1mm to 0.6mm depend on the quality of the sink and the depth of bowls. The measurement can also vary from the drainer to the bowls due to the manufacturing process. Deco sink are available in several stainless steel thickness depending on the models.

THE FINISH

There are several stainless steel finished available, according to customers' needs. The mechanical characteristics of the material remain the same, but the aesthetic differs in the polishing glossy, matt or textured finishes are available.

Most of Deco sink have what is called polish finish. This elegant finish creates an enduring, easy to clean luster that is impervious to water stains and calcium. The polished finish requires numerous hand and machine buffing operations which produce a beautiful luster design.

For those who prefer a brushed appearance, another option is the normal satin finish. Abrasive grinding produces a uniform pattern of satin finish liens on the meal surface.

Deco stainless steel sink are also available in linen or microtextured finishing, which offers an attractive high relief pattern on the sink's surface. This exclusive finish is also made from "surgical" stainless steel, i.e. with all the characteristics of stainless.

THE POP-UP

This practical system takes care of drainage from a button on the drainer surface, allowing the users to empty the bowl without the unpleasant contact with hot water, detergent or small food residues. The pop-up also makes it easy to close the drainer or fill the bowl with water.

THE WASTER

Standard wasters in 3.5" or the practical 3.5" basket waste traps the food particles left from washing up or cleaning vegetables or fruits so that they do not access the sewage system.

THE FITTING

Deco sinks provide all the fitting elements needed to install the sink. It is also possible to order less complete sinks as some plumbers and installers have their own supplier for such elements.

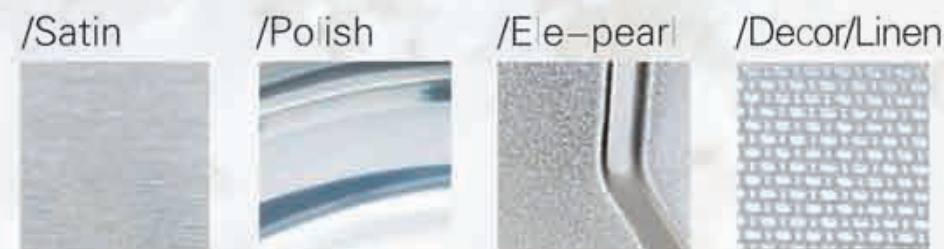

Stainless Steel Technology

Deco uses the latest technology to offer the best finish. For instance, most Teka sink incorporate pressed installation rails or pressed bowls, so we eliminate the welding and sanding operations that can damage the appearance of sinks and raised their prices.

DECO

Glass sink

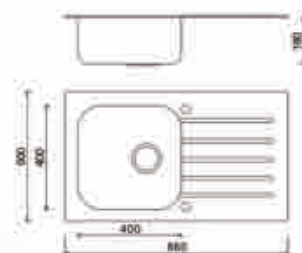

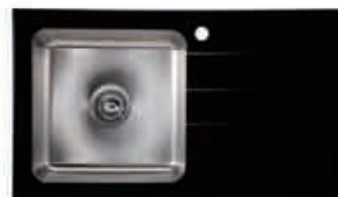

It was time to break the rules and go further, leaving behind old clichés stacked in the mud of time. We only introduced them, and as their union grew stronger, they both committed to give their best.

After their beauty it was resistance, after their toughness it was wisdom.

PVD Color Sink

A FUSION OF STAINLESS STEEL AND CERAMIC BORON NITRIDE
The stainless steel surface is coated with a thin film of nitride ceramic in a process called Physical Vapor Deposition(PVD). The nitride production of precious metals evaporates and ionized in a vacuum chamber. Then the nitride is accelerated with high energy in the vacuum and deposited. Finally, an extra thin and extremely durable layer ceramic nitride is formed on a stainless steel sink. As a result, the stainless steel sink is not only has a unique hue but also has superior scratch resistance.

Granite sink

Granite sinks have the hardness, resistance and appearance of natural stone, combined with the flexibility and smoothness of modern granite. This sink provides unique mechanical characteristics that make it almost indestructible.

DECO

Double bowls with drainer sink

Double Bowls with Drainer improves the sink performance thanks to large and generous bowl with elegant contours.

A board drainer with two large bowls provides all the working space you could need.

It is bigger than most and functional than most.

DECO

Double bowls sink

Why settle for one bowl when you have two?
As simple as that. Two bowls offer more versatility;
while one bowl is being used for cleaning
vegetables or any other cooking duty, the other
one remains untouched, ready to be used for
leaving already used kitchen crockery.

Deco's optional accessories let you make the most of your sink, as they have been especially designed for each individual model. Crockery baskets, plate racks, colander bowls, chopping boards, waster disposal units etc. will quickly become an indispensable part of your kitchen routine.

Stainless Steel Waster

Most of our sink incorporate 3.5" basket waster. The basket traps the food particles left from washing up, or from cleaning vegetables or fruits, so they do not enter the sewage system. It can also be easily removed for cleaning. Deco has not neglected the appearance of its accessory.

Pop-up Basket Waste

Pleasing to look at and more important still, enhancing sink functionality for the user. One such feature is the pop-up basket waster, a practical accessory which could be opened and closed to fill and empty the bowl without direct contact of its contents (hot water, detergent).

Packing System

Individual carton box

Deco Sinks are usually presented in individual carton boxes. All box are stamped with the logo (Deco or custom logo) and print the product model number. Inside the box, the sink and accessories such as waster, fixing clips and sealing strip for its installation are included. This packing system is highly recommended for the individual sale.

Five units carton box

Carton box packs include five sinks and their accessories, waster, fixing clips and sealing strip. This packaging system is specially designed when selling big quantities and the accessories are included in the packaging.

Carboard Protection

It is a comfortable and secure way of packing the sink for its sale in big stores. The accessories are sold separately. Although the sink are not inside the carton box, the protection around the sink perimeter is good enough.
